Tap-to-pay on every Bear Down card, starting with $3,520 now.

Clearline Analytics for Bear Down Bank

Prepared for Renee Castillo, Director of Card Operations

29% of Bear Down cards still can't tap to pay.

1,693

of 5,802 cards have no contactless chip

211

won't be replaced until late 2027 or later

32

are more than two years from renewal

Card extract as of Sept 30, 2026. 211 = cards expiring in 13+ months (179 + 32).

We answer three questions with data you already have, and you see results in six weeks.

1 Which cards renew on their own?

Expiration dates show 1,253 cards renewing by March 2027.

2 Which cards need early replacement, and in what order?

Adding card issue dates ranks the 440 by how long customers have waited.

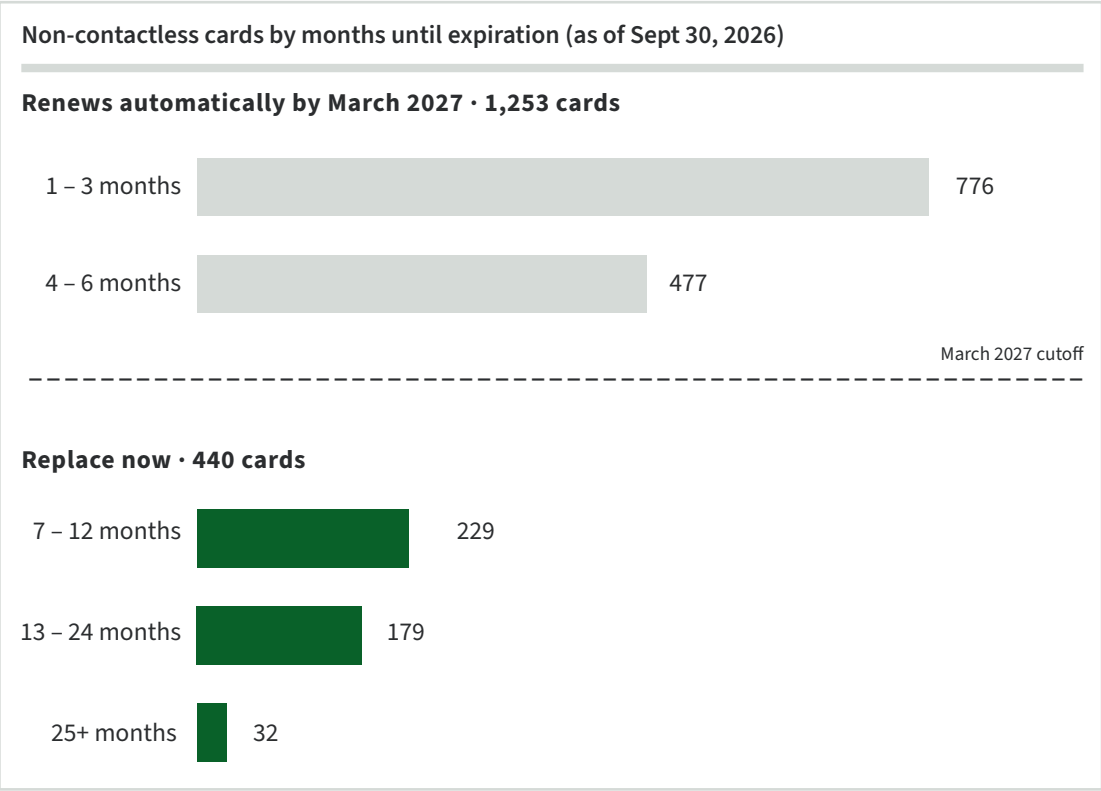

3 Is it working?

A monthly tracker shows non-contactless cards falling to zero.

Week 2: ranked replacement batch

Week 6: live readiness tracker

We've already found the answer: 440 cards need replacing, not 1,693.

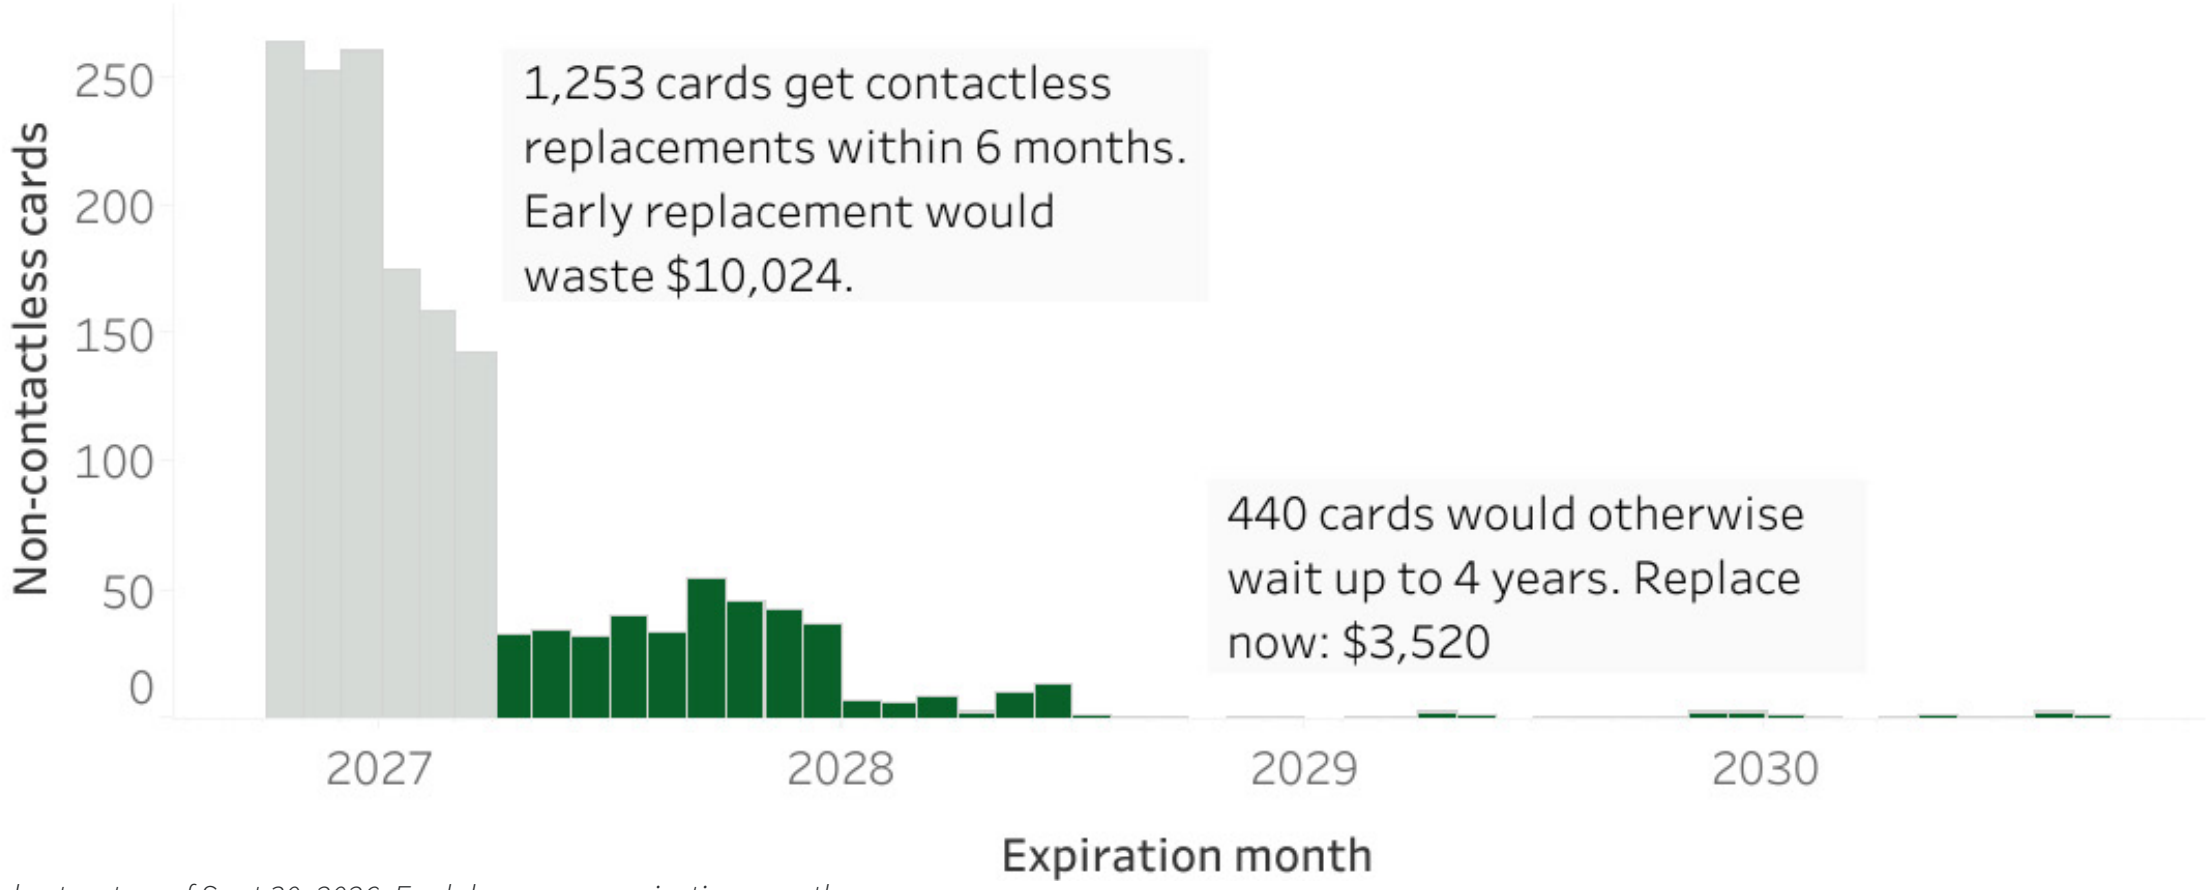

From our work sample for Bear Down Bank

Cards expiring by March 2027 renew automatically. Only the 440 after that need an early replacement batch.

Card extract as of Sept 30, 2026.

The renewal cliff is real: most non-contactless cards turn over by March 2027.

Card extract as of Sept 30, 2026. Each bar = one expiration month.

Phase 1 takes six weeks and spends $3,520, not $13,544.

Weeks 1–2

Validate data.
Rank the 440-card batch.

Weeks 3–4

Release the batch.
Build the tracker.

Weeks 5–6

Hand off the tracker.
Walk you through results and next steps.

Why not replace all 1,693 now?

1,693 cards × $8 = $13,544

$10,024 of that buys cards that renew automatically by March 2027. The 440-card batch closes the gap for $3,520.

Today: approve Phase 1 and the 440-card batch.

Six weeks. $3,520 in replacement cards.

A tracker that follows Bear Down to 100% tap-to-pay.
